DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Election/Restrictions

Applicant's election with traverse of Group V, Embodiment 5, Figures 9, 10 corresponding to claims 53 through 76 readable on the elected species, in the reply filed on July 5, 2005 is acknowledged. The traversal is on the ground(s) that the search is not burdensome to the Examiner and as stated at the bottom of page 1 through the top of page 2 of Applicant's remarks, the Examiner particular disputes the following:

"Although the outstanding Official Action does not identify search classifications, it is believed that the claims of the present application would have to be searched in a handful of sub-classes. Furthermore since electronic searching is commonly performed, a search may be made of a large number of, or theoretically all, substantial additional effort."

This is not found persuasive because it absurdly alleges that the examiner has search tools with nothing short of miraculous abilities. Realistically, each class and subclass that is required in the examination of a particular invention requires proper search and consideration. Even when text searching is appropriate, different claimed inventions may include different keywords as the building blocks of the limitations set forth therein, each claimed invention being significantly different. Thus the Examiner's responsibilities and required efforts are greatly increased. The Examiner may also be required to apply a burdensome variety of prior art in a given Office Action to properly

address each and every limitation of each and every claim. Furthermore, Applicant gives no specific reasons drawn to the merits of the claimed invention why the election of species is not proper. Applicant is reminded that a patent is for one invention.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1 through 52 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 5, 2005.

Specification

The abstract of the disclosure is objected to because of the term "lightbulb". Applicant seems to be referring to an image display panel such as a liquid crystal panel or a DMD, for example. Although it is true that applicant is his own lexicographer, Applicant's use of the term "lightbulb" may easily be confused with a standard lightbulb or illumination source, and not the source of an image. Furthermore, the claims elected for examination with traverse do not address the invention summarized by the Abstract of the Disclosure. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: The term "lightbulb" is objected to for similar reasons already applied in the objection to the abstract.

Appropriate correction is required.

Claim Objections

Claims 53, 62, 71, and 74 are objected to because of the following informalities: Applicant possibly makes two uses of the word “normal” in the each of the independent claims in such a manner that is confusing. The first example found in claims 53, 62, 71, and 74, is as follows: “an intermediate image on the intermediate image surface is formed as a normal image on the projection surface via the reflecting mirrors.” The use of the term “normal” in this context suggests to the examiner that the image is normal because it is not distorted. However, the following use of the term “normal” later in the claims makes the first usage of the term unclear to the Examiner: “a light beam from the reflection dioptric system to the projection surface is guided at an angle to a normal of the projection surface; and the transmission dioptric system is decentered with respect to a normal of the projected object surface.” In this case the Examiner believes the term normal is used to suggest perpendicularity. The Examiner requests that Applicant clarify what is meant by the claimed limitations.

Appropriate correction is required.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
